

EDUCATION

STUDENT (B.E. AI & ML)

ISB & M School of Technology, Pune

PREVIOUS EDUCATION

Diploma in Computer Engineering · GP Yavatmal

SKILLS

Languages

JavaScript (ES6+), TypeScript, Python, PHP, SQL, HTML, CSS

Frontend

React, Next.js, Tailwind CSS, SCSS, Responsive Design

Backend

Node.js, Express.js, REST APIs, PHP

Databases

MySQL, MongoDB, IndexedDB

AI & ML

Google Gemini API, Gemini Vision, OCR, NLP, Computer Vision

LANGUAGES

English (Professional)

Hindi (Native)

Marathi (Native)

OBJECTIVE

Motivated and creative Full-Stack Developer, AI Integration Specialist, and Chrome Extension Developer at ISB & M School of Technology. Eager to build production-grade software and integrate advanced AI models (like Gemini API) into web and browser ecosystems. Experienced in developing scalable, low-latency applications, hosting workshops, and scaling open-source solutions to thousands of active users.

EXPERIENCE

SOFTWARE DEVELOPMENT & TRAINING INTERN

Aug 2025 – Present

Black Orange Talent-India, Pune

- Developed STEM-focused EdTech software and IoT learning modules using ESP32.
- Conducted hands-on technical workshops for 50+ students in electronics and programming.
- Created curriculum documentation, project proposals, and training material.

CHROME EXTENSION DEVELOPER (FREELANCE)

Sep 2023 – Present

Freelance Contracts

- Built production-grade Chrome extensions using Manifest V3, service workers, and content scripts.
- Integrated Google Gemini API for AI text generation and computer vision features.
- Optimized extensions to under 50MB RAM usage with 30% performance improvement.
- Published and maintained extensions on Chrome Web Store and Edge Add-ons.

FULL-STACK DEVELOPER (FREELANCE)

Jan 2023 – Present

Freelance Projects

- Developed full-stack web applications using React, TypeScript, Node.js, and PHP.
- Designed RESTful APIs and database schemas using MySQL and MongoDB.
- Integrated AI services including Gemini API and OCR with 90% data accuracy.

PROJECTS

autoFarmJs

JavaScript

To give players a fully responsive coding experience, the scripting environment requires a bridge between user code execution and UI rendering. Traditional sandboxing using eval blockades the main UI thread during synchronous actions or infinite loops.

cocopizza

Markdown

Cocopizza is a full-stack restaurant management platform developed for a pizza business, combining a customer-facing online ordering website with an integrated Point of Sale (POS) system. The platform streamlines restaurant operations by centralizing order management, inventory tracking, staff access control, and real-time order synchronization between customers and restaurant staff. Built using a client-server-database architecture, the system enables seamless communication between online ordering channels and in-store operations.

ChatApp

JavaScript

ChatApp is a campus-level communication platform designed to ensure secure and efficient interaction among students, with admin oversight to manage and monitor activities. Only authorized users can sign up for the app. 🏠

ACHIEVEMENTS

- Google AI Studio Certified – Gemini API
- GitHub Student Developer Pack Member
- Open-source contributor with 10,000+ active users
